Soft Serve Freezer

Twin Twist, Pump

Features

Offer all the popular soft serve variations from low or non-fat ice creams to custards, yogurt and sorbet. Serve two separate soft serve flavors, or an equal combination of both in a twist. A built-in storage area conveniently provides a choice of four sundae toppings: two heated, and two room temperature.

Freezing Cylinder

Two, 3.4 quart (3.2 liter).

Refrigerated Mix Storage Cabinet

Lower front mix cabinet is independently refrigerated to maintain mix below 41°F (5°C). Solar powered digital thermometer displays mix cabinet temperature. Door is hinged on the right. Two, 9 gallon (34.1 liter) mix tanks. Two air/mix pumps deliver the precise amount of air and mix to the freezing cylinder.

Indicator Lights

Mix Low light alerts the operator to add mix. When the Mix Out light flashes, the unit shuts down automatically to prevent damage.

Electronic Controls

Finished product quality is monitored by Softech™ controls that measure viscosity.

Standby

During long no-use periods, the Standby feature maintains safe product temperatures in the freezing cylinder.

Syrup Rail

Four compartment syrup rail is recessed in front of freezer: two heated and two room temperature. The 2 quart (1.9 liter) reservoirs serve a wide variety of syrups and toppings.

Two Locking Casters

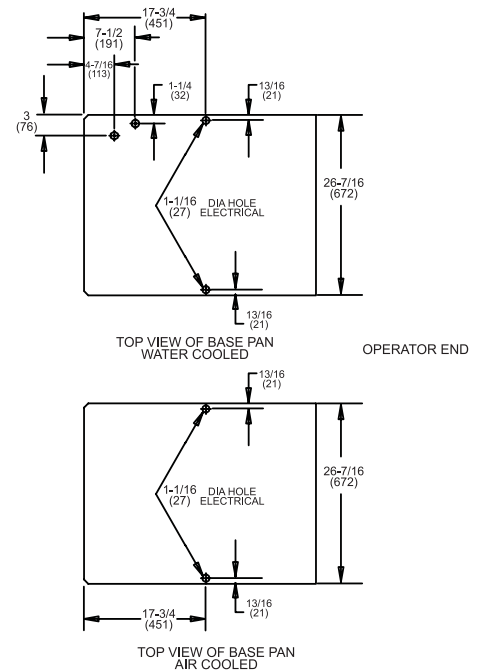

Front casters have a locking feature for operators to lock to maintain equipment in place. The locking casters can be released to move the equipment for cleaning.

Door Interlock System

Protects the operator from injury as the beater will not operate without the dispensing door in place.

Specifications

Electrical

Two dedicated electrical connections are required. See the Electrical chart for the proper electrical requirements. Manufactured to be permanently connected. Consult your local Taylor distributor for cord & receptacle specifications as local codes allow.

Beater Motor

Two, 1.5 HP.

Refrigeration System

Two, 9,500 BTU/hr. R404A
Mix Cabinet, 1,100 BTU/hr. R404A.
(BTUs may vary depending on compressor used.)

Air Cooled

Minimum 3" (76 mm) around all sides and 12" (305 mm) on top. Minimum air clearances must be met to assure adequate air flow for optimum performance.

Water Cooled

Water inlet and drain connections under side of base 1/2" FPT.

Options

- Cone Dispenser
- Draw Valve Lock Kit
- Sneez Guard

Continuing research results in steady improvements; therefore, these specifications are subject to change without notice.
